

**Second Supplemental Expert Report of
Brie Williams, M.D., M.S.**

Parsons v. Ryan, No. 2:12-cv-00601-NVW (MEA) (D. Ariz.)

February 24, 2014

CONFIDENTIAL – SUBJECT TO PROTECTIVE ORDER

I was not able to interview Stephen Swartz, ADC No. 102486, because I did not visit the prison where he is housed. However, Mr. Swartz's medical record indicates that he is 51 years old, and he has a history of both osteoarthritis and rheumatoid arthritis. See ADC 71797, 122538, 134449. As explained in my initial report, isolated confinement as practiced in ADC poses a current and future medical risk of the worsening of symptoms associated with arthritis. It is my understanding that Mr. Swartz has been held in isolated confinement at various points during his incarceration in Arizona. Assuming the diagnoses of osteoarthritis and rheumatoid arthritis are accurate, if he were to be held in isolated confinement in the future, he would be at a substantial risk of harm from exacerbation of these conditions.

CONFIDENTIAL – SUBJECT TO PROTECTIVE ORDER

Dated this 24 day of February, 2014 at San Francisco, California.

A handwritten signature in black ink, appearing to read "Brie Williams", written over a horizontal line.
